ABOUT ME

Great interfaces start with a clear understanding of the people using them.
As a UX/UI Designer, I turn complex requirements into intuitive, accessible, and visually consistent digital experiences. My background in Product Support and Product Management gives me a practical view of real user problems and business priorities, and I bring that into every design decision.

I want to keep growing as a designer: taking on more responsibility, shaping design quality within teams, and building products that people genuinely enjoy using.

EXPERIENCE

UX Designer
2023 - now
Eurofunk Kappacher GmbH

- Led end-to-end product design, from discovery to delivery.
- Conducted user research and usability testing to inform and validate solutions.
- Created user flows, wireframes, prototypes, and responsive UI designs in Figma.
- Contributed to scalable design systems and accessible, consistent experiences.
- Collaborated with cross-functional teams to align user needs with business goals.
- Designed for mobile devices, tablets, and desktop screens in standard and widescreen formats.

Product Manager
2020 - 2023
Hagleitner Hygiene International

- Analyzed customer feedback to identify product opportunities.
- Translated business needs into requirements and product initiatives.
- Aligned customers, stakeholders, and development teams.
- Supported prioritization, roadmap planning, and product strategy.

Product Support / Customer Support
2019 - 2020
Hagleitner Hygiene International

- Resolved customer issues and answered product-related questions.
- Identified recurring user pain points and improvement opportunities.
- Shared customer insights with product and development teams to inform enhancements.
- Supported customer satisfaction and product adoption.
